## HEALTHCARE

Dear Colleagues,

**LYSINE** - I didn't elaborate in my following **May Podcast** on this ultra-importance Amino that most of society does not get enough of despite the emphasis on animal products. Therefore, it can make a difference to your patient's health if you add Lysine into your compounding blends or recommend that your patients grab a container of 100 grams and 240 grams and drop a few grams into their daily diet. Lysine is important for cell growth and repair and plays an essential role in the production of Carnitine. Some studies have found a prophylactic relationship to taking this regularly to prevent Cold Sores and Genital Herpes. It plays a role in maintaining bone health and strength as it helps the body to absorb calcium and Vitamin C (**Lipo-C is the best option for the best absorption**) making collagen the main protein of the bones, muscles, joints, hair and skin. Lysine is known to have an anxiolytic action through its effects on serotonin receptors in the intestinal tract. It also helps the body absorb iron and zinc.

**L LYSINE**

**W/S EX GST**  
**\$10.26** RRP \$16.93

**W/S EX GST**  
**\$21.80** RRP \$35.97

**NHAA Conference at Sunshine Coast** - We are so glad we were able to get a stand at this terrific event and will have some wonderful specials and extra information for the attendees.

**PLEASE COME AND SEE US AT THE EVENT.**

In my podcast I discussed the Peroxynitrite being the ROS (reactive oxygen species) villain when it comes to DNA damage. I omitted to say **superoxide** was the radical that steals nitric oxide to form ONOO-. The saving grace is Super Oxide Dismutase (SOD) and Glutathione peroxidase to quench SO. Patients hypertensive will more often than not see a drop in BP within days of preventing the formation of OONO- and soon may experience a reduction of inflammation in joints. One of the key trace elements to increase the production enzyme SOD is manganese. Antacids can block absorption from the diet. A wholefood diet is the best source and

crustaceans and my go-to is organic black strap molasses. One prebiotic sulfur-containing food can be a lifesaver for the elderly. **Fulvimin** is rich in Fulvic Acid and Humic Acid can make up for a load of lost trace elements in the diet and increase the negative charges in the body fluids because it donates and accepts electrons equals a phenomenal long-ranging antioxidant. I have recommended Fulvimin (formerly Volcomin) for over 20 years be added to your herbal extracts from 5-10%. Brings back vitality faster and children start to thrive again. These trace nutrients bolster the body against over-acidity and help reduce damage from EMFs etc.

**Click Here**

**Unique Colloidal Silica** is another super antioxidant. We have been importing bulk liquid from the US for the past 20 years. We promise to bring this out in a surprise patient formulation soon. In the meantime, it boosts the powerful antioxidant effect of BioActiv **Lipo-C**. The inventor Ignacio Cisne was a geologist and whilst searching for minerals with very high heat resistance to make panels for the spaceships this particular rock caught his imagination. After selling some of his technology to NASA he spent a good portion of this researching Alka Hydroxy over the next 10 years at the Texas University. You can look at the research by going to [www.lipHsolutions.com](http://www.lipHsolutions.com). This extraordinary molecule raises SOD, Glutathione and Catalase the 3 super redox enzymes, so it has a place in longevity hacks and for benefiting many suffering from various chronic challenges. You will understand more if you view the research. When you consider the role of **Bioregulation** 6 drops of pure Alka Hydroxy can turn water at pH6 into over pH9 so you can add up the dots. It has little taste, indefinite shelf life and so I decided to make this available at this time as a bulk compounding ingredient for you to be able to dispense in 20ml or 50ml for your patients. Because it's so alkaline warning to be careful with children and to not get into their eyes. A large dose is not poisonous but could burn the gullet. Always add to purified water. We haven't had time to present this to the distributors. If you are interested we can bottle you **500ml and the cost is \$189 plus GST**. Postage would be free.

**Berberine HCL** caps 500mg (Pure) Another Comp Med you may need. They say this is a Nature's Alternative to the weight loss injection used for blood sugar regulation and reduced appetite. Berberine HCL does heaps more. In a few months, we will have this as an ingredient in the Compounding range. To obtain a pack of 60 caps we can make this available on a private label for **\$24.20** a bottle plus gst.

---

**CONGRATULATIONS**

Ela From Vitalis Health has won our Vital.ly competition requesting they stock BioActiv and BioResearch.

Prize \$250 in stocks.

Please keep sending your emails to Vital.ly.

## MAY 2024 SPECIALS

### COMPOUNDING PRODUCTS 10% OFF

**Black Ginger Ext.**  
90g  
\$15.50

**L Glutamine (Pure)**  
100g  
\$12.19

**Myo Inositol**  
100g  
\$19.90

## Device Sale! \*\*Prices Reduced: up to 50% OFF\*\*

We have limited equipment that we are no longer distributors for and would like them to go to a good home. So we are now offering around **50% OFF** the normal price for what's left. These are real bargains. These equipment items may be depreciated through your business as a tool of trade. Prices are GST-free. Contact us for more information.

When I was a clinician over many decades I regularly gave light therapy with **Bioptron**, the worlds most researched polychromatic healing light device. The big unit we have here for sale is normally around \$18,000 inc. We are prepared now to sell you our unit for the incredible bargain price of **\$9250** inc so be quick. This is the most revered device overseas for beauty therapy, aiding injuries, burns, acne and mood disorders.

To replace the world-renowned **Cyberscan** listed device, an authorised leading biofunctional device that costs around \$35,000 we have available for **\$9,900** (+ cost to transfer and update with the latest software to ensure you have everything covered including the latest variants). Any Cyberscan clinician would love to have an extra unit for evaluation and treatment. I can imagine that at this price we can make that possible. Cyberscan is heavily based on Tesla technology and can measure the energy field I believe more effectively than any other clinical unit in its class.

### **Bioptron/Hyperlight Deal**

There were a few issues with the Bioptron / Hyperlight site and it was down when some people were trying to order or schedule their consultations...

And to take advantage of the huge deals on the Bioptron light therapy device itself, the color therapy set, and/or the Hyperlight Eyewear (*which you'll refuse to ever look at a screen without again once you get them!*)...

And/or schedule a consultation to make sure you're getting what's right for you...

[You can do that here. :\)](#)
