[Weed, Feed, Seed and Restore Brochure](#)

You are welcome to print this out (or ask for printed copies) and put on your notice board to help invite conversation on this for a protocol that would suit the patient and maybe their budget.

**The number 1 weeder:

when the sludge is coming away. The sludge promotes acidity and tends to harbour parasites. If the pH of the stool is low then some bugs like blasto, kebsiella, chlamydia and strep can thrive and we know what their toxins can do to the body. Colon Flush is alkaline and you can test the urine in the morning after a few days to see it climb to a healthier safer pH. The Magnesium Oxide we use is super soluble so when taken at night helps relax smooth muscle and despite maybe a few rumblings in the tummy is a lesser distraction to good sleep. Being Number 1 in the number 2 business is good for your business.

The Colon Flush and the Diatomaceous earth to contribute to a higher pH in the colon for a healthy biome. This DE combination is beneficial to help draw waste out of diverticulum, sooth and heal. BIORESEARCH INDEPTH: REMEDY EDUCATION

Speaker By: **Glen Gillard**

January 29th, 2025 (Part 1) &
February 5th, 2025 (Part 2)

Online via Zoom

Glen Gillard, Founder of BioActiv Healthcare, has 50 years in the natural health industry specializing in Naturopathy, Iridology, Homeopathy and Kinesiology. He has extensive experience in clinical practice, product formulation, lecturing and writing for magazines and journals. He has collaborated with some of the industry's most well-known experts and founding fathers and is a wealth of knowledge.

Great news! If you missed our October training session, don't worry —we're offering it again in two parts on January 29th and February 5th, 2025.

This 2 part seminar gives a wealth of Homeopathic knowledge. Many experienced practitioners already appreciate the benefits of prescribing with BioResearch or sometimes like a refresher, and we also aim to share this valuable knowledge with the newer practitioners who haven't yet had the chance to understand how our remedies work to address core issues effectively.

Bioresearch Formulas are known for their ability to enhance hormesis, thereby activating the healing potential of the innate immune and nervous systems. For example, Bioresearch GT2 drops (6 drops TDS 30 minutes before meals) used alongside Formula 12 (10 drops upon arising) is a highly effective combination that helps balance the entire endocrine system and support fluid drainage. While it's not a remedy for Hashimoto's, it does boost the HPA Axis vital force and regulation. This protocol has proven beneficial for patients struggling with cravings and lack of motivation to exercise, which often leads to weight gain. It's also important to minimize the effects of halogens from fluoride and bromide in inorganic grains and legumes, so opt for organic and gluten-free options.

Looking forward to seeing you at the free sessions! (Recording will be available for a fee.)
