[Watch the Parasite recording](#)

Dear Colleague,

It's swim wear time again and now warm enough to get to the beach and enjoy the sun and the sea. It's a worry for many as this year they may have become extremely overweight and too embarrassed to disrobe.

Our solution **BioActiv WMD** Weight Management Drops 50ml ties in the Dr Simeon diet also known as the hCG diet. Dr Simeon injected the hormone into his patients and had them on a strict diet of 500 calories daily and had brilliant success in correcting metabolism and maintained his objective was to reset the hypothalamus. This later fired up an industry with Homoeopathic hCG drops and the Dr Simeon diet. He was advocating not to stimulate the body with exercise and requiring more calories. After a few decades of working with the drops and diet with my patients, I found the compliance was poor on 500 calories and the patients who engaged in muscle loading did much better and lost the most weight and improved lean

muscle mass and generally were better on the Simeon diet around 900-1000 calories. I also found that after 6 - 8 weeks many found their skin to be getting dry and was a time of plateau. So I put them on a high fat Ketogenic diet for the next 6 weeks and then back to Simeon if they still had more flab to resolve. I had some massively obese patients. I recall one young lady who had built so much fat on her upper legs and buttocks she could hardly walk. After 13 weeks she had lost over 20kgs and took up bike riding to work which she was unable to do when she came to me. Focussing on Lean Muscle Mass to boost metabolism is key and that means very high-quality proteins and amino acids are required. The **WMD drops** are herbal with Glycetracts of Peppermint, Star Anise, Spike Lavender and Rosemary with the Energetic frequencies of hCG, Arginine, Ornithine, and Glutamine and Jojoba Bean. This formula as its good for settling digestion, supports the Simeon diet, and has the benefit of helping to lower hunger and is a good breath freshener. We haven't got this thus far into the distributors and negotiating with them. Many practitioners get these WMD drops off us under their label so they can be seen as weight loss experts with their formulations. You will notice the trade price is about \$20 less than the old homoeopaths so are very affordable.

WMD WEIGHT MANAGEMENT DROPS

50ml | \$28.70

Herbal with Glycetracts of Peppermint, Star Anise, Spike Lavender and Rosemary with the Energetic frequencies of hCG, Arginine, Ornithine, and Glutamine and Jojoba Bean

It's common to add **BioActiv Fulvimin** (Colloidal mins with Fulvic Acid) and now I am recommending the **BioActiv 22 Aminos**, too. BioActiv Compounding now has **Organic PHGG** in 300-gram containers and would be needed by some patients to keep them regular and boost SFAs which help lower hunger. We have launched in the compounding ingredients 100gram and 240 gram **Mag HMB** (Hydroxymethylbutyrate). This form of magnesium is carrying ketones the best SFAs for bowel health, brain energy and balancing appetite. If they have a history of constipation the **BioActiv Peristal** powder may do the trick and will fit with the diet. For a long time unless you used reverse osmosis you couldn't get fluoride out of the water. Now for a few hundred dollars, you can get regular in-line filters from the water shops that remove 99.9% of fluoride. Without addressing these halogens we are pushing up the hill.

Fulvimin

200ml/ 500ml/ 2Lt/ 5Lt
\$16.66/\$31.21/ \$116.5/\$267

Organic plant-derived colloidal minerals sourced from ancient shale beds combined with volcanic cinders and humate. Combined in this way the volcanic cinders are chelated by the humic and fulvic acids. Contains vitamins, amino acids, plant enzymes, chelated minerals and colloidal trace elements.

22 Pure Amino Blend

May boost lean muscle mass.

Organic PHGG

Might boost SFAs and help lower hunger.

Peristal

May do the trick and will fit with the diet.

Violet

Violet is the colour of the crown Chakra at the crown of the head. It represents states of high consciousness and divine connection. When deficient imbalances can contribute to cynicism, disregarding what is sacred, close-mindedness and disconnection of spirit. We recently launched a research water solution called **BioActiv Lab's Alka Blue 50ml** to add the benefits of high pH Alka Hydroxy (Colloidal Silica) a very powerful promoter of redox enzymes and bioregulation to help restore the Matrix with pure Methylene Blue (MP) at 0.5%. I am

delighted that it turned into a brilliant Violet. Food for thought, a few years ago when I was suffering from a challenging health condition and part of my therapy was Pranic Healing. My healer was wonderful and I could feel the energy of each session. I asked him one day what energy you work with and he said it's a Magnificent Violet we receive from the creator. So I am excited that this colour transition has happened and it will not change the electron donation boosting mitochondria that is akin to the MP. Who knows it might shine brighter. We are happy to private label this also as would be beneficial to weight loss programs to lower systemic acidity helping boost the enzymes of Catalase, SOD and Glutathione often deficient in individuals with obesity leading to excess inflammation.

Comparative Benefits of TTFD and Benfotiamine in Compounding: A Focus on Energy, Neuropathy and Chronic Conditions

Compounding with TTFD (Thiamine Tetrahydrofurfyl Disulphide) Vit B1 is relatively unknown in Australia. It has become popular amongst practitioners in the UK and now more in the US. It was brought to our attention when a colleague said she was importing the 100mg caps from the UK and it had been of benefit from this daily to improve energy as she was a very long-standing sufferer of CFS. How does it compare to the popular Benfotiamine its B1 cousin? Benfotiamine has shown great benefits in helping ameliorate the symptoms of Neuropathy and as a better absorbed BI, it can help boost health and energy in the muscles and may help solve the riddle of fibromyalgia. Can also help the faster recovery of muscle energy from endurance training, reduce the production of glycated proteins that could damage nerve coats and contribute to the creation of cataracts. Benfotiamine is about half the cost of TTFD whereas TTFD is better on all scales of utilisation and is best to cross the Blood Brain Barrier so the therapeutic dose range for TTFD can be around 100-300mg a day in split doses as may help affect positive change in many chronic neurological conditions, The bad news as we have to directly import Benfotiamine powder and have run out and next delivery is towards the end of this month. Good news we have good stocks of TTFD at the moment so here's a chance to maybe upgrade in your compounding. To make it easy to dispense and add synergy use magnesium as the carrier. You can

select from BioActiv's Compounding Magnesium in Citrate, Orotate or HMB form. Depending on what you want to achieve. New HMB hydroxymethylbutyrate is a ketone so could bring a zing to the brain with the TTFD. This activated B1 combines with pyrophosphate in the body to form cocarboxylase which participates in the oxidative decarboxylation of Pyruvate and Ketoglutarate in glucose metabolism and is necessary for sugar metabolism when deficient oxidation is blocked to form pyruvate, lactic acid accumulates and effects the body's energy supply.

TTFD

Sizes: 60g

Wholesale price: \$48.40

- May enhance energy production
- Might improve cognitive function
- Could provide metabolic and cardiovascular support.

Mag HMB

Sizes: 100g/ 240g

**Wholesale price: \$16/
\$26.60**

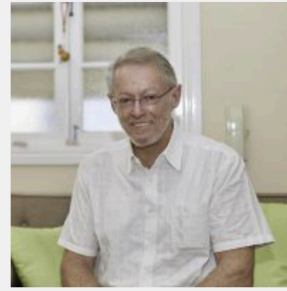

- Supreme Muscle builder.
- Helps prevent Sarcopenia - the enemy of aging.
- SCFA for colon and brain health. Some are calling HMB nature's Ozempic.

Good news: if you miss the training session we provided this week, we will offer this again in November. The older praccies often know and love the benefits of prescribing with Bioresearch. We want to get this information out to the younger praccies who haven't had the opportunity to understand how the remedies work so well to get to the heart of the problems.

Bioreseach Formulas have the effect of raising hormesis which one could say wakes up the healing potential of the innate immune and nervous system. Bioresearch **GT2** drops 6 drops TDS 30 mins before meals used in harmony with **Formula 12**: 10 drops upon arising is a much-needed combo to help bring the whole endocrine system into balance and balance the fluids to support drainage. Not a remedy for hashimotos; however, a boost to the HPA Axis vital force and regulation. I used this protocol often when patients gave in to cravings and lost motivation to exercise piling on the weight easily. The caveat now is also reducing the impact of halogens from flouride and bromide in inorganic grains and legumes (eat organic and gluten-free).

Lipo P.E.A & Corydalis

200g | \$29.09

BioActiv Lipo PEA is back with an added Corydalis for extemp prescribing!
No price change. 200grams still the same, each serving of 5 ml contains 120mg equiv to 1200mg dried herb (10-1). This a logical addition as Corydalis can act synergistically to PEA and is used in TCM as an Analgesic, Chi Energy, Tremors, Nerve Recovery and more.
Best avoid in pregnancy or chronic liver conditions.

DEVICE SALE! **UP TO 50% OFF**

We have limited equipment that we are no longer distributors for and would like them to go to a good home. So we are now offering around **50% OFF** the normal price for what's left. These are real bargains. These equipment items may be depreciated through your business as a tool of trade. Prices are GST-free. Contact us for more information.

When I was a clinician over many decades I regularly gave light therapy with **Biopton**, the world's most researched polychromatic healing light device. The big unit we have here for sale is normally around \$18,000 inc. We are prepared now to sell you our unit for the incredible bargain price of **\$9,250** inc so be quick. This is the most revered device overseas for beauty therapy, aiding injuries, burns, acne and mood disorders.

To replace the world-renowned **Cyberscan** listed device, an authorised leading biofunctional device that costs around \$35,000 we have available for **\$9,900** (+ cost to transfer and update with the latest software to ensure you have everything covered including the latest variants). Any Cyberscan clinician would love to have an extra unit for evaluation and treatment. I can imagine that at this price we can make that possible. Cyberscan is heavily based on Tesla technology and can measure the energy field I believe more effectively than any other clinical unit in its class.
